Scheruhn Industrie-Mineralien - a long-standing tradition with history...

Deutsche Specksteingruben

These different corporate names reflect the development of our company that was **founded in the year 1908** and since this time has been a **family-owned business for over four generations**.

With the beginning of the last century, we started an **own mining site at the heart of the Fichtelgebirge**, which was open **till the late 1980s**, although the won soapstone was of a quality that limited its usage.

The ongoing industrialisation led to growing demands of the manufacturing industry, which made it necessary to offer a wider range of product types. **Global business partnerships with leading mines** empower us to fulfill all requirements of today's industrial users. In addition, our **professional warehousing** guarantees **quick delivery** just in time.

Beside extending our portfolio of "**anorganic bulking agents**" we also added **white and coloured pigments** to our product range.

Quality is more than a promise...

In-house quality inspections as well as regular analyses done by renowned external laboratories ensure together with a continuously production-site monitoring high quality standards; **sichern neben der Produktionsüberwachung einen gleichbleibend hohen Qualitätsstandard**; of course this starts already by carefully **screening the raw materials**.

By ensuring all these issues, our company has created a strong base that will also build trust in the future to solve any challenge with **experience and courage**. This is our promise to everybody affiliated with our company - employees and business partners.

Our commitment to the **highest levels of quality assurance** is the prerequisite to maintain and expand our relationships to existing business partners and to attract new ones.

We guarantee **professional advise, individual services fulfilling your requirements** and **prompt delivery** - all this comes together with the promise of a **trustworthy partnership**.
